VIRTUAL-IT CLOUD HOSTING

PUT YOU VIRTUAL-IT LMS ON THE CLOUD AND ACCESS YOUR DATA FROM ANYWHERE

As with all of our products, our business is driven by Client and Industry needs, and companies now demand the choice of purchasing one of our Learner and Training databases and being able to host it on our Cloud Server, monthly.

SO WHAT ARE THE ADVANTAGES OF A CLOUD-BASED LMS?

Disaster Recovery: For any business, the loss of data can be catastrophic, with hosting your LMS on our Cloud server your data will automatically be backed up daily.

LMS Software Updates Done for You: As the Cloud server is "Offsite" you don't have to worry about the time or personnel to ensure your LMS software is updated regularly.

Work from Anywhere: Work from anywhere that has an internet connection. You can connect using laptops, tablets, and even smartphones.

Scalability: One of the benefits of Cloud-based Products is being able to increase/decrease your server needs.

Easy-to-Use: Virtual-IT databases have been supporting southern African Industry for over 20 years, so our products are tried and tested.

Green: Our databases have been "Green" for many years. By installing, supporting, and training via the internet, we have cut our carbon footprint. With our new Cloud-based systems we will continue along that path.

VIRTUAL-IT CLOUD HOSTING
