

Do you want to get your excellent training materials online?

- Would you like to reach a much larger market and not be constrained by classroom sizes?
- Would you like to have your e-Learning platform hosted by a local company, with 21 years of experience in the South African Adult Education Industry?
- Would you like to save all the expenses associated with Classroom training?
- Would you like a seamless transition to an online training platform?

Then look no further, Virtual-IT has the solution for you – the Virtual-Learning e-Learning platforms.

Some courses need to have face-to-face instruction, but many others can be internet-based, giving training institutes the chance of a much wider audience, at the same time as being cost-effective.

e-Learning also allows Learners who cannot get to Training Facilities, due to location or disability, the possibility of growth.

Further, you can offer Blended Training by adding a Webinar facility such as Teams or Zoom, and, as your Facilitator works with your Learners “Live”, you can record the lesson, and upload it later as video content for your Course.

Now what about those cost saving?

- No Venue Costs, including energy requirements such as, Air Conditioning, Lights, etc.
- No worries about Load-shedding
- No Catering headaches.
- No Transport Costs.
- No Printing of Materials.
- Reduced Facilitator & Assessor Costs

And this system is Green!

The Good News is that you can now have your own e-Learning site

Wouldn't it be great to be able to get your training content online quickly? including Videos, Slides, Audio, Animation, Documents, etc. Make your Courses exciting, interactive and accessible.

With e-Learning, you are no longer restricted to classroom size numbers when planning Training Interventions.

If needed, you can offer your Programs to Learners who live in areas that have poor bandwidth or costly mobile charges, by giving them the opportunity to download the Training Material, work with it manually, and then re-upload the content for assessment.

You can add in Forums where Learners can communicate with their Facilitators, Administrators, or each other, in an open discussion or within allocated groups, so they do not feel left out or unsupported.

With automated Assessments, the system will not only grade the Learner's responses to Quizzes but will inform the Learner how well they did straight after they have submitted their answers.

Offer Certificates to Learners who have either attained your pass mark for the Course (different Courses can have different pass marks), or if you prefer you can add a Certificate of Attendance.

Virtual- LEARNING

Prices

R 6 950.00 ex vat

Once-Off payment
for your first course as per the
specifications to the right,
including all set up cost.

Cost per additional course
